

Kingcombe Aquacare Ltd, The Cropmead Estate, Crewkerne, Somerset, TA18 7HQ

(Specialist Water Management for Landscapes, Fisheries, Leisure and Conservation)

Environmental Policy Statement

Kingcombe Aquacare aims to provide services and products in a sustainable manner, which safeguards its employees, clients, the public, and the environment. This holistic approach is intended to encompass the present day and the future in its protection against incorrect environmental management.

Kingcombe Aquacare will take responsibility for the sympathetic management and maintenance of the working environment (to the highest practical standards). Whether it is on our premises at The Cropmead Estate or on any operational secondary site the emphasis on environmental management will remain the same. Selection of appropriate materials, transport or materials to and from sites, the correct and safe disposal of waste, and the appropriate and timely completion of any relevant legislative documentation will all fall under the remit of responsible management. The environment shared by our neighbours, the general public and any interested parties will also be considered in the general operation of the company.

All employees have a responsibility to the environment and as such will be made aware of the policies and procedures of this company. Instructions and work methods will be periodically reviewed and amended as necessary to reflect developing environmental awareness. Any employee may have an input or suggestion in this process. All employees will also take positive steps to conserve resources, particularly those, which are scarce or non-renewable.

Information will be made readily available to clients to enable them to use the services and products of the company in a correct manner, so as to avoid unacceptable effects on both man and the environment.

This statement represents a commitment on behalf of Kingcombe Aquacare to strive continually to improve our environmental performance, to prevent pollution, and to move towards sustainable development and management. The company will formalise and regularly review its environmental targets and objectives. The company will form and document its Environmental Management System (EMS) in line with the ISO 14001:2004 working standard and at a later date possibly the European Community Eco Management and Audit Scheme requirements.

With these targets in mind the company senior personnel have a commitment to provide for compliance with all environmental legislation, regulations and licences by keeping themselves informed and up to date. This enhances the company's ability to achieve sound environmental management by the application of the best available technology, provided that it is economically viable to do so.

Kingcombe Aquacare will communicate openly with all interested parties with the mutual intention to enhance the environment, and to such end this statement will be made available to all company employees, clients and the general public on demand.

Signed:
John Colton, Chairman MA CEnv MIFM MIOG
